No. 3753.—The following Notification published by the Government of Bombay, regarding the Lighthouse at Rutnagherry, is re-published for general information:—

The following Notice, descriptive of the Light, Position, &c., of the Lighthouse at Rutnagherry, is published for general information. To admit of ample notice being given before the Light is brought into use, it will not be lighted before the 1st January 1867:—

1.—The Lighthouse at Rutnagherry is a short column raised in the South Bastion of an old Fort built in a very bluff headland rising 300 feet above the Sea. The Light, on the Dioptric principle of the 3rd Order and Red in color, will be visible from a vessel's deck, in clear weather at a distance of at least 18 miles.

2.—The Lighthouse is in Latitude 16° 59' 0" North, and Longitude 73° 15' 47" East of Greenwich, or 0° 27' 33" East of Bombay Lighthouse.

3.—There are three anchoring grounds,—the outer anchorage for sailing vessels, the outer anchorage for steamers, and the inner anchorage for steamers during the fair season only.

4.—Vessels anchoring at the outer-roadstead should do so in 8 fathoms of water at a distance of a little over a mile from the Lighthouse, and with the following bearings:—

Lighthouse, N. 59° 04' E., or N. E. by E.  $\frac{1}{2}$  E.

Adawlut Building,\* N. 81° 33' E., or E.  $\frac{1}{4}$  N.

White Tomb near the beach to the South of the Creek, N. 104° 04' E. E. by S.  $\frac{1}{2}$  S.

5.—Steam vessels making the port at the beginning or close of the South-West Monsoon should anchor in 6½ fathoms with the Lighthouse bearing due North, and the Adawlut Building bearing E. N. E.

6.—The inner anchorage is only available for steamers during the fair season: vessels should anchor in not less than 4 fathoms with the Lighthouse bearing N. W.  $\frac{1}{4}$  N., and the Adawlut E. by N.  $\frac{1}{2}$  N.; that position will place them at a distance of about 1,200 yards from the landing place, and 700 yards from the edge of a ridge of rocks running out from the beach in front of the Custom House.

7.—The Port of Rutnagherry does not afford the least shelter for vessels during the South-West Monsoon; but a vessel in distress would in a measure be sheltered by anchoring in 5 fathoms after rounding the North Point of Meria Donghur—a Hill 3 miles to the North of the Lighthouse.

8.—The Bay between Meria Donghur and the Lighthouse Hill does not afford any shelter, but on the contrary is open to the full force of the monsoon.

The object of the Exhibition is to bring together, for show and competition, cattle and other live stock, agricultural implements and machinery, articles of Indian agricultural and forest produce, and specimens of industrial manufacture and art; and also to afford an opportunity of comparison between the productions of the North-Western Provinces and Oudh and the

dominions of the Chiefs of Central India and Rajpootana. The Exhibition will be arranged in five Departments :—

I.—“ Live Stock.”

II.—“ Agricultural and Animal Products.”

III.—“ Forest and Mineral Products.”

IV.—“ Machinery and Implements.”

V.—“ Arts and Manufactures.”

These Departments will be severally sub-divided as shown in the classified list appended.

The Exhibition will be opened on Monday, the 4th of February, and will be closed on Saturday evening, the 9th idem.

On the last day (9th) there will be an Exhibition of flowers, fruits, and vegetables; and on the afternoon of that day the prizes will also be publicly distributed.

A detailed classified list of each kind of animal and article for which prizes are offered, with the value of the prize to be competed for in each class, will be published at an early date.

The Exhibition will be open to competitors from all parts of India.

Judges will be appointed for each Department, and the prizes will be adjudged on Friday and Saturday, the 1st and 2nd of February.

The Committee will take charge of all live stock, and will provide their food from the date of arrival in the Show-yard until the close of the Exhibition.

The principal object in encouraging the Exhibition of live stock being the improvement of breed consideration will be chiefly given to that point when awarding prizes.

In judging the merits and superiority of machinery and implements, regard will be especially directed to durability, economy, and adaptation to the requirements of the country.

Local and Divisional Committees have been formed, for the purpose of aiding the Central Committee in the collection and selection of live stock and articles for exhibition, and for the arrangement of the despatch of animals, &c., from their several circles to Agra.

The freight of all live stock and articles sent by rail, road, or water to the Exhibition, compensation for breakage, and losses after delivery to Local Committee, Railway tickets for poor contributors or their servants in charge, and road expenses for live stock will be advanced by the Local or Divisional Committee of the circle in which the exhibitor resides, and carefully prepared accounts of all such expenditure must be kept by them. The Central Committee will be responsible for, and will compensate exhibitors on account of, loss or damage to live stock and goods which may ensue after the property has been received in the Exhibition yard.

Curators will be appointed to take charge of live stock and articles which shall, by the approval of the Committee, be admitted into the Show-yard for exhibition.

The Lieutenant-Governor looks to all Officers of Government in these Provinces for their hearty support and co-operation; and His Honor enjoins on all Officers in charge of Districts and Local and Divisional Committees careful attention to, and prompt and full compliance with, the wishes and requisitions of the Central Committee.

# RULES.

I.—The Central Committee reserve to themselves the right of refusing admission to the Show-yard to any live stock, samples of produce, machinery, specimens of manufacture and art, &c., which in their opinion shall not possess sufficient merit to compete for the prizes offered.

II.—Applications for space for machinery must be made to the Joint-Secretary to the Central Committee at Agra before the 18th of September; and at the same time applicants must state whether they require the use of water, and to what extent, for exhibiting their machinery.

The following Order issued by the Government of India, in the Home Department, is re-published for general information:—

No. 3753.—The following Notification published by the Government of Bombay, regarding the Lighthouse at Rutnagherry, is re-published for general information:—

The following Notice, descriptive of the Light, Position, &c., of the Lighthouse at Rutnagherry, is published for general information. To admit of ample notice being given before the Light is brought into use, it will not be lighted before the 1st January 1867:—

1.—The Lighthouse at Rutnagherry is a short column raised in the South Easton of an old Fort built in a very Bluff headland rising 300 feet above the Sea. The Light, on the Dioptric principle of the 3rd Order and Red in color, will be visible from a vessel's deck, in clear weather at a distance of at least 18 miles.

2.—The Lighthouse is in Latitude 16° 59' 0" North, and Longitude 73° 15' 47" East of Greenwich, or 0° 27' 39" East of Bombay Lighthouse.

3.—There are three anchoring grounds,—the outer anchorage for sailing vessels, the outer anchorage for steamers, and the inner anchorage for steamers during the fair season only.

4.—Vessels anchoring at the outer-roadshead should do so in 8 fathoms of water at a distance of a little over a

mile from the Lighthouse, and with the following bearings:—

Lighthouse, N. 59° 04' E., or N. E. by E.  $\frac{1}{2}$  E.

Adawlut Building, N. 81° 33' E., or E.  $\frac{1}{4}$  N.

White Tomb near the beach to the South of the Creek, N. 104° 04' E. E. by S.  $\frac{1}{4}$  S.

5.—Steam vessels making the port at the beginning or close of the South-West Monsoon should anchor in 6½ fathoms with the Lighthouse bearing due North, and the Adawlut Building bearing E. N. E.

6.—The inner-anchorage is only available for steamers during the fair season: vessels should anchor in not less than 4 fathoms with the Lighthouse bearing N. W.  $\frac{1}{4}$  N., and the Adawlut E. by N.  $\frac{1}{2}$  N.; that position will place them at a distance of about 1,200 yards from the landing place, and 700 yards from the edge of a ridge of rocks running out from the beach in front of the Custom House.

7.—The Port of Rutnagherry does not afford the least shelter for vessels during the South-West Monsoon; but a vessel in distress would in a measure be sheltered by anchoring in 5 fathoms after rounding the North Point of Meria Donghur—a Hill 3 miles to the North of the Lighthouse.

8.—The Bay between Meria Donghur and the Lighthouse Hill does not afford any shelter, but on the contrary is open to the full force of the monsoon.

Lighthouse of the Port of Prince Alfonso in the Bay of Calandoray.

The following information is published in amplification of the Notice No. 23 of 26th April 1865:—

At the southern point of the Port of Prince Alfonso in 8° 1' 0" N. latitude, and 123° 13' 30" E. longitude, on the Hill called Admiral Gil, there is a square white Tower with

\* A very large house on the Hill bordering the Creek to the North.

a red house, which is situated to the East of a white house with a red roof, which serves as a dwelling for the keepers. The tower carries an hexagonal lantern with a helmet-shaped top, painted red as well as the lantern. This contains a catadioptrical apparatus of the Fifth Order 81m. 732 above the level of the Sea: there burns a white fixed light, which, in the ordinary state of the atmosphere, reaches to a distance of ten miles.

The said light bears S. 56° W. from the midway of the Channel formed by the Islands of Candareman and Nasoobata; N. 22° W. from the midway of the Channel formed by the Islands Nasoobata and Cameron; N. 59° W. from the midway of the Channel formed by the Islands Cameron and Loombocan; and N. 33° W. from the midway of the Channel formed by the Island Loombocan, and the S. E. Coast of Balabac.

The arc of illumination comprises an extent of 140° from the Strait or Channel North of Balabac to the farthest visible point of the Southern Coast of this Island, and passes at 4 miles S. E. of Nasoobata, at 1 mile E. of Cameron, and at 3 miles S. W. of Loombocan.

Vessels coming from W. by the Channel North of the Island, called the Good Channel, on coming out of it will descrie the lighthouse to the S. 36° W. at a distance of 7 miles. Those which come from the N. E. will cut the arc of illumination in so far as they have the Island of Bijan bearing North, that of Candanuran West, and that of Nasoobata S. 40° W., this last at 5 miles distance.

To those which stand in by the E. (which is not prudent on account of the bank which there is between Nasoobata and Cameron) on entering the arc of illumination, Nasoobata ought to bear N. 60° W. and Cameron S. 25° W. this last at a distance of 4 miles.

Those which come by S. E. guided by buoys on the N. part of the Island Loombocan will enter the arc of illumination as they have the Island of Cameron bearing N. 22° E., and that of Loombocan S. 20° E., both at the distance of 3 miles.

Those who stand in by the S. will find themselves within the illuminated sector when they are 5 miles W. of Loombocan, and go coasting along the Island of Balabac at a distance of 2 to 3 miles.

The bearings are correct.

Masingloc Shoal.

It appears from a Despatch sent by the Commander of the corvette *Narvaez*, to the Commander-in-Chief of the Station at the Philippines, dated 8th September 1865, that having left Manila on the 5th of the same month for the Masingloc or Scarborough Shoal, for the purpose of saving the English bark *Eliza Hunter*, which was said to be aground thereon, he came in sight of the Shoal at 9 in the morning of the 7th, and approached it within a short distance, although the said bark did not appear. He was thus enabled to note a summit or head of rock about 2 metres high, against which the sea broke from the S. W., and to distinguish on the N. E. point of the Shoal other smaller ones, also of rock or coral, from two to three feet out of water.

At mid-day the chart was picked at 15° 11' N. latitude, and 123° 54' longitude E. of San Fernando (117° 41' 48" E. of Greenwich) by the meridian altitude, and the chronometers and the shoal bearing to the W. at 3 miles distance, from which it is to be inferred that its eastern part or edge is in the English charts 14 miles further E. than the position given by the chronometers regulated at Manila before and after the expedition.

It is known from the same Despatch that the mate and some of the crew of the lost bark went on board the *Narvaez*, and that the charts referred to are English; but as the author of them is not mentioned, it is not possible to say whether they are from the Admiralty, or by some private person.

With respect to the charts of this Department, the difference which appears in the situation of the Shoal is almost identical, and to express it with greater clearness the great rock comes near about 123° 51' E. longitude, according to the abovementioned chronometrical observations.

Reef of the Niad.

Lieutenant D. Coriazo Pateroy Martinez, Commander of the hooker *Niad*, has sent a Despatch, dated 4th January 1866, to the Commander-in-Chief of the Philippines, from which the following is an extract:—

"On the 28th September 1865, at 7-40 in the morning, when sailing E. S. E. with a fresh wind from S.  $\frac{1}{2}$  S. W., and sea trending from S. W., breakers were descried ahead on the larboard tack, for which reason I gave orders, after observing them well, to bear away to avoid them, and made course to N. E.  $\frac{1}{2}$  E. At 8 hours 30 minutes circumstances being favorable for the determination of the hourly, various altitudes of the sun were taken with confidence. At that time the said breakers bore N. 60° E. and at an estimated distance of 7 miles, they could be quite clearly distinguished from the crests of the main-  
yard, and appeared to be caused by a reef of rock about 2 miles in extent from N. to S., which is not marked on the charts."

"At 9 hours 45 minutes the said danger was out of sight, and I went on my track hauling on the starboard tack; but at mid-day, with the altitudes of the sun, observed at 8 hours 30 minutes in the morning, and the meridian which was also to be depended on, I placed it in 35° 41' 0" S. latitude, and 45° 42' 37" 5 E. longitude."

As the *Niad* did not take soundings, nor does it appear that she observed the breakers at a short distance, and on the other hand the charts show different Shoals, doubtful, or of uncertain position, in those places, this Department confines itself for the present to warning Mariners to be on the alert when they cruise in the waters of the locality which the Commander of the hooker assigns to the supposed reef.

Notification.—The following Rules for the better management and preservation of the Government Forests in British Sikkim, drawn up under Act VII. of 1865, have been confirmed by the Viceroy and Governor General in Council, and are in accordance with Section 6 of the Act, published in the *Gazette of India*:—

Forest Rules, British Sikkim.

I.—The Administration of the Forests will be vested in the following Officers:—

1st.—The Conservator of Forests.

2nd.—His Assistants.

3rd.—Subordinate Forest Officers, viz., overseers, darogahs, jemadars, duffadars, forest watchers, and peons. It

will also be the duty of all Police Officers to watch over the observance of these rules, and to afford every assistance to the Forest Officers in the exercise of their duties.

II.—Within the limits of the Forests, the marking, girdling, lopping, or felling of trees, shrubs, bamboos, or canes, and the removal, or attempted removal, of any natural produce of the Forests, except with permission of the Conservator, is absolutely prohibited under the penalty of confiscation provided by the Act.

III.—Within the limits of the Forests, the grazing of cattle, the burning of lime or charcoal, and the lighting of fires is absolutely prohibited, except with the permission of the Conservator of Forests. Any one found so doing shall be arrested and shall be liable, after conviction before a Magistrate, to a fine not exceeding fifty Rupees, or in default, to imprisonment for a period not exceeding fourteen days.

IV.—The arrangements for the sale and cutting of timber in Government Forests shall be made by the chief local Forest Officer, subject to the approval of the Conservator of Forests. V.—Cultivation in Government Forests of roots and grain of any kind, except in tracts defined by the local Forest Officer, and on the payment of the rent usually levied from squatters in the District, is prohibited. Any infringement of this rule will be punished, after conviction before a Magistrate, by a fine not exceeding fifty Rupees, and confiscation of the crop, or in default, by imprisonment not exceeding fourteen days.

VI.—Timber in the Government Forests will be sold as follows:—

1st.—In the temperate Forests, trees belonging to the following species may be sold to purchasers requiring a small number of trees, and who may fell and remove the timber. No sale shall be considered as concluded, and no timber is to be delivered on account of the same, unless the full amount of the purchase-money has been paid to the Forest Officer conducting the sale. The sale will hold good for a certain period. Timber not removed from the Forests within the time fixed, whether paid for or not, remains the property of Government. Such sales do not require the approval of the Conservator of Forests, but may be concluded by the Forest Officer in charge of the Division. This timber will remain the property of Government until the full amount of purchase-money is adjusted. These sales will hold good for a certain period. Timber not brought away within the time fixed, whether paid for or not, will remain the property of Government. Sales of timber under this rule are not to be concluded for a longer period than three years. The sale cannot be concluded without the written sanction of the Conservator of Forests, Lower Provinces, although the Assistant Conservator may conduct the preliminary arrangements for the sale.

VII.—Persons permitted to cut timber in Government Forests will be required to register in the Office of the Assistant Conservator of Forests, British Sikkim, a specimen or *far simile* of the brand or mark wherewith their timber shall be marked under the superintendence of the Forest Officers. A fee of Rupees ten will be charged for the registration of a mark or brand. The use by private individuals of the Government timber brand, or of any other brand already registered for use in the Division, is prohibited, and any person found using a property mark other than his own, or effacing any property mark from timber, either in the Forests, or in transit from them, or from timber floating in a river, before such timber has paid the duty, will be liable, on conviction before a Magistrate, to a fine not exceeding Rupees five hundred, or in default of payment, to imprisonment for a term not exceeding six months.

VIII.—All timber which may be transported by the rivers Teesta, Mahanuddes, Balasun, Meech, and Kunkaie, will be stopped at the stations of the Forest Department for the purpose of levying fees payable on such timber at rates to be published hereafter. No rafts or timber will be allowed to pass or quit these examining stations until a pass has been given by the Officer in charge of the station after payment of such rates.

If such conditions are not observed, the timber will be liable to confiscation.

XII.—River or road borne produce passing a post established for the collection of duties under this rule will be exempt from duty if it be shewn that such produce was grown or collected in private Forests, or that it was bought from the Forest Department, or has already paid Forest duty elsewhere. XVI.—All contracts, licenses, permissions granted to parties to exercise any privilege, or to do any act in Forests under the preceding rules, must contain a condition that infringement of any general rule or special provision will entail forfeiture of such contract, license or permission, and also of any wood or Forest produce marked out or gathered, provided it is still within the limits of the Forest.

#### NOTIFICATION.

The 31st August 1866.—The following Order received from the Government of India, in the Home Department, is published for general information:—

From A. BRASHER, ESQ., Traffic Manager, Indo-European Telegraph Department, to the Acting Director, Mekran Coast, and Sub-Marine Telegraph, Kurrachee,—(No. 774, dated the 9th July 1866.)

SIR,—I HAVE the honor to report that a certain number of messages from India have lately been received for transmission to Europe, some directed by routes not yet available, for which the senders have doubtless been charged more than the ordinary rates; and others directed by unusual lines, at extra cost, and at the expense of certain delay.

2. As this would probably not continue, if the public were possessed of more information respecting the lines between India and England, I have extracted the main routes from the different Telegraph Maps, Traffic records, and other papers in this Office, and beg to subjoin them, with the view of their being published, if considered expedient.

3. Commencing from the Sub-Marine Line they are—

	Kurrachee

Fao		Ispahan	
Busreh		Teheran	
	Bagdad		
	Diarbeker		
	Constantinople		
	(then)

Belgrade	Belgrade	Belgrade	Salonica
Buda	Buda	Buda	Aolona
Vienna	Vienna	Vienna	Otranto
Dresden	Munich	Munich or Inspruck	Ancona
Berlin	Stuttgart	Bregenz	Parma or Genoa
Hanover	Frankfort	Basle	Turin
Amsterdam	Cologne	Dijon	Lyons
Lowestoft or Yoxford	Ostend	Pari	Dijon
			Paris
	Dover	Dieppe, Boulogne Calais	Dieppe, Boulogne Calais
		Staplehurst, Folkestone, Dover	Staplehurst, Folkestone, Dover.

4. It would be of value to have statistics of the separate working of the above routes, so that senders might direct their messages by those which generally work the quickest. Until obtained, however, it is better for senders not to specify the route. Messages are then more likely to be transmitted from Constantinople by the one which is for the moment working best.

5. The routes *vid* Russia are as follows:—

	Bushire	
	Teheran	
	Tiflis	
1		3
Stavropol		Stavropol
Charkow		Charkow
Pattawa		Moscow
Kief		Petersburg
Jitomer		Endkumen
Radziwillow	Warsaw	Thorn
Myslowitz	Berlin	Berlin
Berlin	Amsterdam	Amsterdam
Amsterdam	Lowestoft, Yoxford	Lowestoft, Yoxford.
Lowestoft, Yoxford		

6. The Russian route was first used in the transmission of messages to India in May and June 1865. But the messages were so seriously delayed that the route was discontinued. It has, however, been lately employed again and with more success. Messages came by it, in June last, in from 5 to 6 days. The average being only half a day, more than the average of messages *vid* Constantinople, during the same month. Government sanction has not yet been received to employ the Russian route for messages from India.

7. The following is the route *vid* Alexandria:—

Fao  
Bagdad  
Diarbeker  
Latakia  
Beyrout  
El-Arich  
Cairo  
Alexandria  
Malta  
Modica

and by the Italian and French Lines to Dieppe, Boulogne, and Calais.

8. The branch between Diarbeker and El-Arich, connecting the main Indo-European Line with the Egyptian Lines, and the Malta and Alexandrian Cable, was finished in the early part of 1865. It was constructed for traffic between Turkey and Egypt. Last month, however, a few messages from Europe reached India *vid* Alexandria. But the replies to them, directed to be returned the same way, were refused by the Ottoman Department, which transmitted them *vid* Constantinople.

9. Before the Alexandria route can be employed, except in very rare cases, not only must the objection of the Ottoman Department be overcome but the tariff much reduced. As it at present stands, it would cost Rupees 16-8-0 more to send a message to England *vid* Alexandria than *vid* Constantinople.

1. The River Damooda connecting Rivers Balessur and Kotcha and Kaligunga,—
2. The Cowcally River from its junction with the Kotcha and Kaligunga Rivers up to the place from where the Jallakatty Bhorani Khall rises,—
3. The Jallakatty Bhorani Khall from its junction with River Cowcally to its opening into the River Jallakatty,—is published for information under the provisions of Section XI. of the Canals' Act (V. of 1864, B. L. C.) :—

1. Every vessel on entering any of the above navigable channels shall be liable to measurement by the Officer in charge of the Toll Station, for the purpose of ascertaining the amount of toll to be paid.

2. The tonnage of every vessel, whether laden or empty, shall, for the purposes of the Canals' Act and of these Rules, be determined by the following measurements :—

(a.) The product of half the length of the vessel, from stern to stern, measured along the water line, multiplied by the interior greatest breadth of the vessel, multiplied by the depth from the water line to the bottom of the vessel, is to be taken as the number of maunds upon which toll should be levied.

(b.) The measurement of the length is to be made in feet, rejecting inches. The measurement of the breadth and depth is to be made in feet and quarters of feet, rejecting portions of less than a quarter of a foot.

(c.) In calculating the amount of toll to be levied, any fraction of 100 maunds, less than fifty maunds, is to be omitted; and a fraction exceeding fifty maunds is to be charged as fifty maunds only.

3. No raft will be admitted into any of the channels in excess of fifty feet in length or five feet in breadth. No timber, bamboos, or grass will be admitted, except securely and compactly packed in the form of a raft.

4. Every vessel entering any of the channels shall be furnished with a ticket on paying the prescribed toll. The ticket will specify the date of entry, the maundage of the vessel, and the amount of toll paid.

5. No vessels whatever, except such as are employed on works connected with the maintenance or improvement of the lines of channels in question, shall be exempted from paying toll.

6. Every vessel or raft which has paid toll shall be allowed three days to pass through any one of the channels, the days of entering and leaving being both included; and any vessel or raft remaining in any part of the channels longer than the period above fixed, shall for each day in excess of such period be charged demurrage equal to one-half of the toll paid. Every vessel or raft remaining in any one of the channels more than one month, without authority from the Supervisor, shall be subject to be summarily removed.

7. Any person infringing any of the above Rules, or wilfully interfering in their enforcement, shall be liable, under Section XI. of the Canals' Act, to a fine not exceeding 50 Rupees for any one offence.

The object of the Exhibition is to bring together, for show and competition, cattle and other live stock, agricultural implements and machinery, articles of Indian agricultural and forest produce, and specimens of industrial manufacture and art; and also to afford an opportunity of comparison between the productions of the North-Western Provinces and Oudh and the

dominions of the Chiefs of Central India and Rajpootana. The Exhibition will be arranged in five Departments :—

I.—“ Live Stock.”

II.—“ Agricultural and Animal Products.”

III.—“ Forest and Mineral Products.”

IV.—“ Machinery and Implements.”

V.—“ Arts and Manufactures.”

These Departments will be severally sub-divided as shewn in the classified list appended.

The Exhibition will be opened on Monday, the 4th of February, and will be closed on Saturday evening, the 9th idem.

On the last day (9th) there will be an Exhibition of flowers, fruits, and vegetables; and on the afternoon of that day the prizes will also be publicly distributed.

A detailed classified list of each kind of animal and article for which prizes are offered, with the value of the prize to be competed for in each class, will be published at an early date.

The Exhibition will be open to competitors from all parts of India.

Judges will be appointed for each Department, and the prizes will be adjudged on Friday and Saturday, the 1st and 2nd of February.

The Committee will take charge of all live stock, and will provide their food from the date of arrival in the Show-yard until the close of the Exhibition.

The principal object in encouraging the Exhibition of live stock being the improvement of breed, consideration will be chiefly given to that point when awarding prizes.

In judging the merits and superiority of machinery and implements, regard will be especially directed to durability, economy, and adaptation to the requirements of the country.

Local and Divisional Committees have been formed, for the purpose of aiding the Central Committee in the collection and selection of live stock and articles for exhibition, and for the arrangement of the despatch of animals, &c., from their several circles to Agra.

The freight of all live stock and articles sent by rail, road, or water to the Exhibition, compensation for breakage, and losses after delivery to Local Committee, Railway tickets for poor contributors or their servants in charge, and road expenses for live stock will be advanced by the Local or Divisional Committee of the circle in which the exhibitor resides, and carefully prepared accounts of all such expenditure must be kept by them. The Central Committee will be responsible for, and will compensate exhibitors on account of, loss or damage to live stock and goods which may ensue after the property has been received in the Exhibition yard.

Curators will be appointed to take charge of live stock and articles which shall, by the approval of the Committee, be admitted into the Show-yard for exhibition.

The Lieutenant-Governor looks to all Officers of Government in these Provinces for their hearty support and co-operation, and His Honor enjoins on all Officers in charge of Districts and Local and Divisional Committees careful attention to, and prompt and full compliance with, the wishes and requisitions of the Central Committee.

# RULES.
